

PRODUCT COMPLIANCE DECLARATION

SUBJECT: Conflict Mineral (Metal: Gold, Tantalum, Tin, and Tungsten)

The following information has been provided by our supplier:

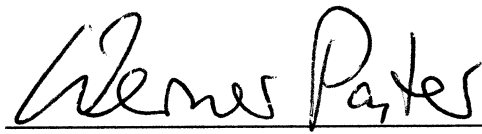

Products: EuroPort label part numbers 13XXXXX
(all product numbers)

Label Materials: 2 mil White/Silver/Clear Polyester
1 mil and 1.5 mil Clear Polyester over laminate
3.8 mil White Polypropylene

Inks: Colored Thermal Transfer Printing Ribbons

The manufacturer of our labels has verified and confirms that none of the raw materials listed in the Conflict-Free Sourcing Initiative are knowingly used to produce our label constructions.

There is only one exception pertaining to a tin catalyst that is used to cure the **silicone release coating** on the white paper liners used only with silver and clear polyester label materials, but none of these substances are knowingly used or intentionally added during the manufacturing process. The liner supplier indicated that they continue to work with their Tin catalyst suppliers on that matter. They have stated that they do not intentionally formulate the catalyst with nor are they aware that the catalyst contains any metal material sourced from the Eastern 'conflict region' of the DRC. They have a Supplier Code of Conduct in place and expect their suppliers to conduct their operations in a manner that does not result in labor or human rights violations.
